In re:

PETROLEUM RECYCLING CORPORATION

Respondent.

Docket No. TSCA-09-91-0002

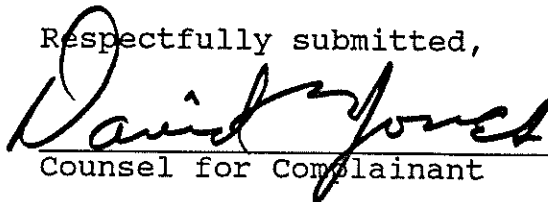

STATUS REPORT

Representatives of the parties to this administrative enforcement action have met and exchange their views. Complainant believes that this matter will settle.

A conference call has been set up between the Complainant and Respondent with NEIC to discuss the analytic methods that are currently used by Respondent and their effectiveness. That conference call is scheduled to take place on Wednesday, July 10, 1991. Complainant believes that this discussion will allow the parties to put the finishing touches on their settlement.

To permit the parties to complete the conference call and incorporate their discussion in the settlement, Complainant moves the presiding Administrative Law Judge to modify his Notice and Order dated May 21, 1991, to permit the submission of the prehearing exchange after the conference call. Complainant believes that the parties will know if settlement is eminent by July 26, and suggest that that date be set for submitting the prehearing exchange.

Respectfully submitted,

Counsel for Complainant

CERTIFICATE OF SERVICE
